

BC Transfer Students

Profile and Performance (2018-19-2022/23)

BCCAT has conducted studies on BC transfer student profile and performance for nearly 30 years. These studies compare BC transfer students' profile and performance with the demographics and performance of students who entered the universities directly from a BC high school. The results of the current research support many findings of the previous similar studies and also uncover trends that were specific to the latest reporting period, part of which coincided with the COVID-19 pandemic.

Upgrading Programs

Student Transitions from Adult Basic Education (ABE) Upgrading Programs into Further Studies at BC Post-Secondary Institutions

This study identified routes from ABE upgrading courses into undergraduate and other programs within the BC post-secondary institutions that offer upgrading courses. To evaluate the success of ABE students in further post-secondary education, interviews with ABE professionals and data from previous provincial and institutional research on the outcomes of ABE programs were employed.

Summer Melt

Exploring "Summer Melt" for BC Post-Secondary Institutions

This short report reviews factors contributing to "summer melt", including different types of barriers for admitted post-secondary applicants, strategies to reduce summer melt and their success. The prospects and options of estimating summer melt at the system level in BC are also discussed.

NOTE: "Summer Melt" denotes a phenomenon when post-secondary students who received an offer of admission and may have paid a deposit when accepting the offer, "fail to enroll at all in the fall after high school graduation".
